2.0 Document Revision History

Version Control Note: All documents in development are indicated by minor versions i.e. 0.1; 0.2 etc. The first version of a document to be approved for release is given major version 1.0. Upon review the first version of a revised document is given the designation 1.1, the second 1.2 etc. until the revised version is approved, whereupon it becomes version 2.0. The system continues in numerical order each time a document is reviewed and approved.

COVID-19 Group Risk
Assessment

PUBLIC

Version: 13.0

4.0 Introduction

Current international public health activity is aimed at reducing the spread of the currently circulating novel coronavirus, which causes COVID-19 infection. This coronavirus is a novel agent whereby there is no immunity in the world's population to the infection. The two main methods of preventing the spread of infection are hygiene measures and social distancing.

This risk assessment has been produced to identify all controls in place at Winn Group to manage the risks, in as far as is reasonably practical, presented by COVID-19.

Control measures specified to reduce risk are based on current guidance from the UK Government.

5.0 Objectives, Aim & Scope

5.1 Objectives

This risk assessment affirms Winn Group's commitment to have in place control measures that ensure that Winn Group employees can go about their duties in a safe and secure environment.

5.2 Aim

The aim of this document is to define the requirements for physical and environmental controls that will be applied to mitigate the risks presented by COVID-19 in the workplace.

5.3 Scope

This risk assessment applies to

- All employees of Winn Group and associated subsidiaries, contractors, volunteers, vendors, partners and visitors;
- All Winn Group premises.

6.0 Risk Ratings

Risk ratings are calculated by considering the likelihood of an event occurring in conjunction with the Consequence should that event occur.

6.1 Determine The Magnitude Of Risk

Magnitude of risk is calculated as *Likelihood + Consequence* where:

	Likelihood	Description
5	Almost Certain	Is expected to occur in most circumstances
4	Likely	Will probably occur
3	Possible	Might occur
2	Unlikely	Could occur but doubtful
1	Rare	May occur but only in exceptional circumstances

	Consequence	Description
5	Catastrophic	Permanent injury or death, extensive damage or disruption
4	Major	Serious injury, significant damage or disruption
3	Moderate	Significant injury, significant damage or disruption
2	Minor	Minor injury, minor damage or disruption
1	Insignificant	No/minimal injury, minimal damage or disruption

6.2 Risk Score Matrix

Winn Group utilise the following risk score matrix to determine the risk rating (the magnitude of risk):

				-	Consequence		
			Insignificant	Minor	Moderate	Major	Catastrophic
			1	2	3	4	5
	Almost Certain	5	6	7	8	9	10
þ	Likely	4	5	6	7	8	9
Eikelihood	Possible	3	4	5	6	7	8
Ē	Unlikely	2	3	4	5	6	7
	Rare	1	2	3	4	5	6

6.3 Risk Rating

Once the Risk rating is determined the following actions are required to address the risk:

Rating	g	Risk Category	Description				
2 – 4 Low Risk		Low Risk	Manage risk with routine procedures				
5	5 Medium Risk		Specific Manager responsibility to reduce risk				
6 – 7	6 – 7 High Risk		Requires Senior Management attention to plan to reduce the risk				
8 – 10		Extreme Risk	Detailed action plan required to reduce the risk immediately				

7.0 COVID-19 – Risk Register

Key: L – Likelihood; C – Consequence; R – Risk Rating.

COVID-19 Infection	Person infected with COVID-19 enters a Winn Group Site	David Office	01/06/2020	3	5	8	Consideration by the board of directors in light of the UK government announcement that England will move to Plan B in response to the risks of the Omicron variant has resulted in the following employee logistics:		5	7	Ongoing
							Employees Number				
							Attending Winn Group premisies during core 307 hours				
							Attending Winn Group premises on evening/weekend shift pattern				
							Split home 50 working/Office				
							Home working 25 Total 397				
							 The above numbers are the maximum employees within Winn Group premises at any given time and does not compensate for annual leave or ad-hoc remote working or external appointments. 				
							Employees attending the office who cannot work effectively from home, for one or more of the following reasons: job role is office based; home workstation configuration unsuitable; infrastructure constraints;				

				Inh	erent I	Risk		Re	esidua	al Risk	
Risk Title	Risk Description	Risk Owner	Date Raised	L	С	R	Mitigating Controls Implemented	L	С	R	Date Closed
							 new employees in training & probation period. 				
							• Staggered shift times implemented, with:				
							 Employees starting/finishing work over a two hour period; 24/7 operations at Saxon House Increased opening times to 2000hrs within other Winn Group buildings 				
							 Employees who feel unwell before the start of their shift are to stay at home; 				
							 Employees encouraged to download and use the NHS Covid-19 App on their mobile device; 				
							 Hand Sanitiser available at entrances at all Winn Group Sites; 				
							 Individual hand sanitiser bottles issued to be carried by Winn Group Employees for use throughout working day; 				
							• Communication to all employees defining the conduct expected at all times on Winn Group sites.				
							Lateral Flow Tests are available to all employees for asymptomatic testing
